

System Prototype

Dr. Ron Davis

CIS-330-01 System Analysis & Design

Hayden Duran, Jacob Fielder, Samuel Senecal

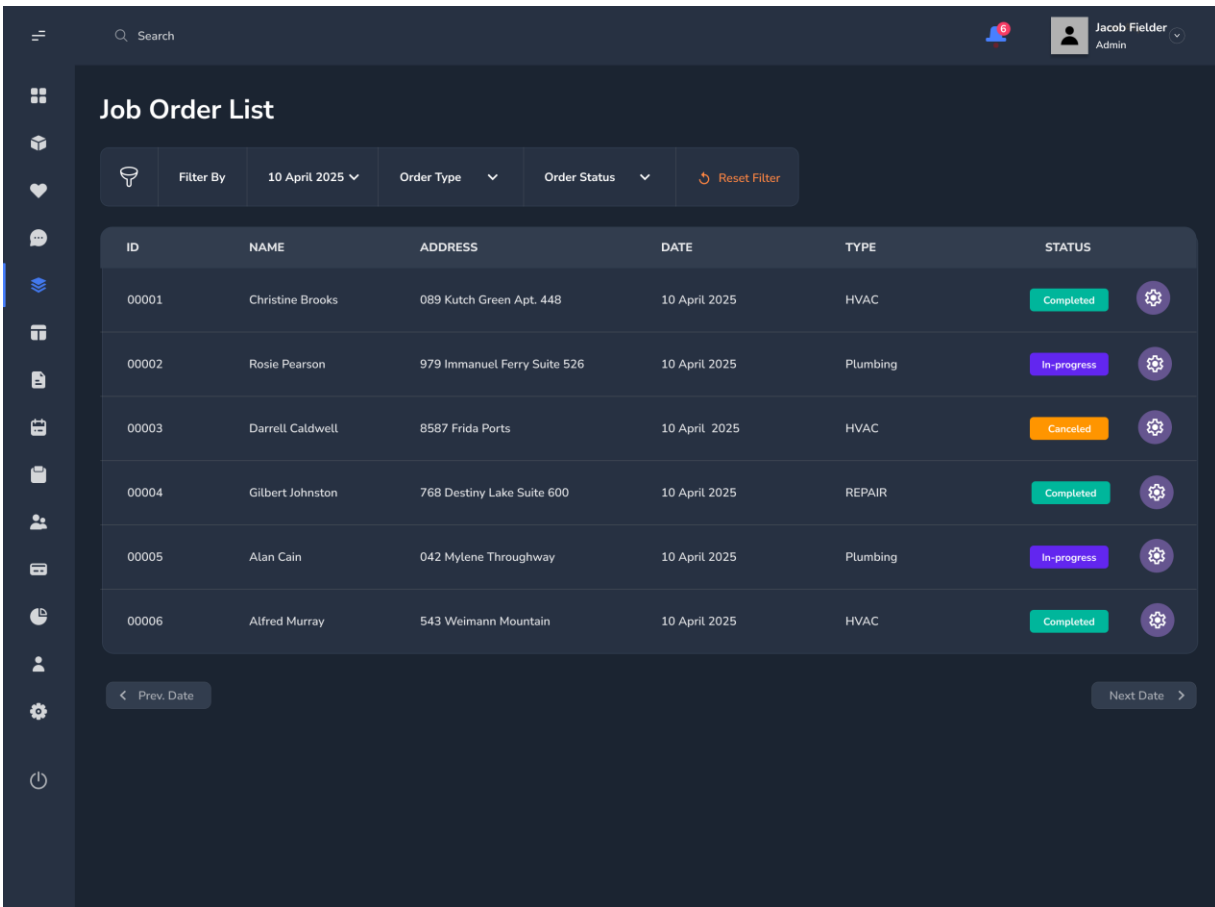

Prototype Description:

JHS Login Page A - This page contains boxes that request a user for their login credentials, and login button, and a forgotten password selector if the user has forgotten their password.

Dashboard Page B - This is the Dashboard page that displays important metrics like sales details and recent job details. The user is also able to navigate to different pages by using the left side vertical menu.

Job Order List Page C – Users can **sort previous and current jobs** by using the **filter** at the top of the page. This page shows customer information and gives an option to edit the job with the gear icon to the far right.

Job Order List Expanded Page D - Users can expand the list using the **gear icon and edit the selected job's details, status, etc.**

Create Job Listing Page E – Users can input information gathered from customer phone calls and email requests to create a new job listing. Users will put in general customer information as well as discern job priorities and provide unique information through use of the description box.

Device Mockup:

This is an example of what our final prototype would look like on stationery and mobile devices. The mockups include a desktop computer, a laptop, a tablet, and a smartphone.

Prototype Flowchart:
